- CovertCall Runs in the background and auto starts every time your computer is

#### Overview

FC-Tech has developed a **Network Based Alert System** that is highly effective and should be included in all security / safety planning. Via a set of predefined Alert buttons CovertCall provides instant alerts to all computers on a local area network. Each Alert has a predefined alert message that can be added to before it is sent.

Emergency alarms can instantly alert PCs with full screen "Alert PopUps". No additional wiring is required! Save money on costly wired duress solutions. Install software on each computer on your network and they magically link

**Safety is critical in today's workplace...**
