Overview

FC-Tech has developed a Project Documentation tracking Software - A great program for a small construction or service orientated companies. Provides the end user the ability to track all aspects of a project, service calls, etc. ProjectLink is a relational database program that shares data for easy setup of projects, reports, transmittals, etc... ProjectLink is a multi user program to allow interaction between all members of your project/service staff.

Documenting projects is critical in a claim situation...
